Welcome, fellow racers, to our mighty Mushroom Racers! Prepare to dive into the exciting world of Mushroom Racers, where speed, strategy, and the power of the blockchain converge to create an unparalleled gaming experience. Here, you'll learn about our vision, the cutting-edge technology that powers our game, and the exciting opportunities that lie ahead for our community. Let's begin our journey together!

**What is Fantom?**

Fantom is a high-performance, scalable, and secure blockchain platform designed for decentralized applications (dApps) and smart contracts. It boasts a unique consensus mechanism called Lachesis, which enables fast transactions and low fees while maintaining security and decentralization. Fantom's ecosystem supports various DeFi protocols, NFTs, and other blockchain-based applications, making it a versatile and powerful platform for developers and users alike.

## GENERAL FAQ

**Phase 0 - Pre-Launch**

Our Pre-Launch phase is the initial stage of our project, where we lay the groundwork for the upcoming Mushroom Racers game. During this phase, we focus on building a strong foundation for our project by developing the game's core mechanics, creating a vibrant community, and establishing partnerships with key stakeholders in the blockchain and gaming industries. The Pre-Launch phase is crucial for ensuring the success of the game and building a loyal community of players and supporters.

**Phase 1 - Pre-Breeding**

The Pre-Breeding phase is the second stage of our project, where we focus on the development of the game's breeding mechanics and the creation of the game's NFT marketplace. During this phase, we will work on the implementation of the breeding mechanics, which will allow players to breed their Mushroom Racers NFTs to create new, unique characters with different attributes and abilities. The Pre-Breeding phase is important for ensuring the game's long-term sustainability and providing players with a rewarding and engaging experience.

**Phase 2 - GEN2**

The GEN2 phase is the third stage of our project, where we introduce the second generation of Mushroom Racers NFTs to the game. During this phase, we will release a new set of Mushroom Racers NFTs with different attributes and abilities, which will be available for players to breed and race with the first generation of Mushroom Racers NFTs. The GEN2 phase is important for expanding the game's ecosystem and providing players with a wider variety of characters and gameplay options.

**Phase 3 - Pre-Breeding (Breeding)**

The Pre-Breeding (Breeding) phase is the fourth stage of our project, where we focus on the development of the game's breeding mechanics and the creation of the game's NFT marketplace. During this phase, we will work on the implementation of the breeding mechanics, which will allow players to breed their Mushroom Racers NFTs to create new, unique characters with different attributes and abilities. The Pre-Breeding (Breeding) phase is important for ensuring the game's long-term sustainability and providing players with a rewarding and engaging experience.

**Phase 4 - Live Game**

The Live Game phase is the final stage of our project, where we launch the game to the public and begin the process of building a community of players and supporters. During this phase, we will focus on promoting the game, building partnerships with key stakeholders in the blockchain and gaming industries, and ensuring the game's long-term sustainability and success.

## ROADMAP

**Phase 0 - Pre-Launch**

- Conceptualize the game and its core mechanics, including the breeding system, NFT marketplace, and the GEN2 phase.
- Assemble a team of developers, designers, and marketing professionals to work on the project.
- Create a vibrant community of players and supporters through social media, forums, and other online platforms.
- Establish partnerships with key stakeholders in the blockchain and gaming industries, such as Fantom and other DeFi protocols, NFT marketplaces, and gaming guilds.
- Develop a strong brand identity and marketing strategy to attract players and investors.
- Ensure the game's long-term sustainability and success by building a loyal community of players and supporters.

**Phase 1 - Pre-Breeding**

- Develop the breeding mechanics, which will allow players to breed their Mushroom Racers NFTs to create new, unique characters with different attributes and abilities.
- Create the game's NFT marketplace, where players can buy, sell, and trade their Mushroom Racers NFTs.
- Implement the GEN2 phase, which will introduce the second generation of Mushroom Racers NFTs to the game.
- Release a new set of Mushroom Racers NFTs with different attributes and abilities, which will be available for players to breed and race with the first generation of Mushroom Racers NFTs.
- Ensure the game's long-term sustainability and providing players with a rewarding and engaging experience.

**Phase 2 - GEN2**

- Release a new set of Mushroom Racers NFTs with different attributes and abilities, which will be available for players to breed and race with the first generation of Mushroom Racers NFTs.
- Ensure the game's long-term sustainability and providing players with a rewarding and engaging experience.

**Phase 3 - Pre-Breeding (Breeding)**

- Develop the breeding mechanics, which will allow players to breed their Mushroom Racers NFTs to create new, unique characters with different attributes and abilities.
- Create the game's NFT marketplace, where players can buy, sell, and trade their Mushroom Racers NFTs.
- Ensure the game's long-term sustainability and providing players with a rewarding and engaging experience.

**Phase 4 - Live Game**

- Launch the game to the public and begin the process of building a community of players and supporters.
- Promote the game through social media, forums, and other online platforms.
- Establish partnerships with key stakeholders in the blockchain and gaming industries, such as Fantom and other DeFi protocols, NFT marketplaces, and gaming guilds.
- Develop a strong brand identity and marketing strategy to attract players and investors.
- Ensure the game's long-term sustainability and success by building a loyal community of players and supporters.

## TOKENOMICS

### SEYDOR

**TOTAL SUPPLY: 7,000,321**

Minted on-chain, the Mushroom Racers game will have a total supply of 7,000,321 Seydor tokens. Seydor is the native token of the Mushroom Racers game, and it will be used for various purposes within the game, such as breeding, racing, and purchasing in-game items and upgrades. The total supply of Seydor tokens is set at 7,000,321, ensuring scarcity and maintaining the value of the tokens in the game's economy.

**RACE REWARDS:**

| WINNER | TOP 10 | TOP 100 | TOP 600 |
|---|---|---|---|
| 100 SYDOOM | 20 SYDOOM | 4 SYDOOM | 2 SYDOOM |

## BREEDING:

## GAME FAQ

**Q: What is the goal of the game?**

A: The goal of the game is to breed and race your Mushroom Racers NFTs to earn rewards and upgrade your characters. The game's breeding system allows players to create new, unique characters with different attributes and abilities, which can be used in the game's racing competitions to earn rewards and upgrade your characters.

**Q: How does the breeding system work?**

A: The breeding system allows players to breed their Mushroom Racers NFTs to create new, unique characters with different attributes and abilities. The breeding system uses a random number generator to determine the attributes and abilities of the offspring, ensuring that each breeding session will produce a unique character with a different set of attributes and abilities.

**Q: How do I earn rewards in the game?**

A: You can earn rewards in the game by breeding your Mushroom Racers NFTs to create new, unique characters with different attributes and abilities, which can be used in the game's racing competitions to earn rewards and upgrade your characters. The game's racing competitions will be held on a regular basis, and players will be able to earn rewards based on their performance in the competitions.

**Q: What is the GEN2 phase?**

A: The GEN2 phase is the third stage of our project, where we introduce the second generation of Mushroom Racers NFTs to the game. During this phase, we will release a new set of Mushroom Racers NFTs with different attributes and abilities, which will be available for players to breed and race with the first generation of Mushroom Racers NFTs. The GEN2 phase is important for expanding the game's ecosystem and providing players with a wider variety of characters and gameplay options.

**Q: How do I participate in the game's NFT marketplace?**

A: To participate in the game's NFT marketplace, you will need to purchase some of the game's native token, Seydor, and use it to buy and sell your Mushroom Racers NFTs. The game's NFT marketplace will be a decentralized platform where players can buy, sell, and trade their Mushroom Racers NFTs with other players in the game's ecosystem.

**Q: How do I join the game's community?**

A: You can join the game's community by joining our social media channels, such as our Discord server and our Telegram group, where you can interact with other players and supporters of the game, ask questions, and stay up-to-date on the game's development and upcoming events.

## GAME RULES

**Character Selection**

Choose from a diverse roster of characters, each with unique attributes and abilities. Consider your character's strengths and weaknesses when selecting your character for the race, as this will impact your performance on the track.

**Breeding**

Breed your Mushroom Racers NFTs to create new, unique characters with different attributes and abilities. The breeding system uses a random number generator to determine the attributes and abilities of the offspring, ensuring that each breeding session will produce a unique character with a different set of attributes and abilities.

**Racing**

Participate in various racing competitions to earn rewards and upgrade your characters. The game's racing competitions will be held on a regular basis, and players will be able to earn rewards based on their performance in the competitions.

**Upgrades**

Use the rewards earned from racing competitions to upgrade your characters, improving their attributes and abilities to gain an advantage in future races.

**Trading**

Participate in the game's NFT marketplace to buy, sell, and trade your Mushroom Racers NFTs with other players in the game's ecosystem.

**Community Interaction**

Join the game's community by joining our social media channels, such as our Discord server and our Telegram group, where you can interact with other players and supporters of the game, ask questions, and stay up-to-date on the game's development and upcoming events.

## TIRES

**The tires are an invisible attribute. Depending on the quality of the tires, the speed of the vehicle will be affected. For example, a "Very Old" tire will have a lower speed than a "Brand New" tire.**

**The following formula is used to calculate tire delay:**

**Tire Delay = Quality * Compound**

**Compound: 1 = Hard, 2 = Medium, 3 = Soft**

| Quality | Compound | Delay(s) |
|---|---|---|
| 0.75 (random integer) | Compound | 0 (gain) / 1 (remain remained) |
| Quality = 1 | Compound = 1 | 0 (gain) |
| Quality = 1 | Compound = 2 | 1 (remain) |
| Quality = 1 | Compound = 3 | 2 (1 + 1) (delay) |
| Quality = 2 | Compound = 1 | 0 (gain) |
